

SAHAND HAJISEYEDI

Coquitlam, BC, Canada

604-773-6879 | sahand2k24@gmail.com | [linkedin.com/in/sahandseyedi](https://www.linkedin.com/in/sahandseyedi)

PROFESSIONAL SUMMARY

Cybersecurity and Digital Forensics graduate (B.Tech) and incoming full-time Master of Cybersecurity student at SFU, with hands-on experience across digital forensics, network security, and IT infrastructure. Skilled in forensic imaging and analysis (Magnet AXIOM, Cellebrite), firewall and VPN configuration (MikroTik, WireGuard, L2TP/IPSec), Active Directory administration, and PC/laptop imaging and deployment across multi-site environments. CompTIA A+ and Security+ certified. Canadian citizen with a long-standing interest in national security, strong written and verbal communication, and the ability to work independently or in a team under pressure while maintaining discretion.

EDUCATION

- Master of Cybersecurity (Full-time)** Sep. 2026 – Apr. 2028 (expected)
Simon Fraser University — Burnaby, BC | Includes mandatory four-month co-op work term
- Bachelor of Technology in Cybersecurity & Digital Forensics** Sep. 2023 – Apr. 2025
British Columbia Institute of Technology (BCIT) — Burnaby, BC
- Diploma in Computer Systems Technology** May 2021 – May 2023
Vancouver Community College — Vancouver, BC

WORK EXPERIENCE

- Network Engineer — Solimedia Technology** Oct. 2025 – Mar. 2026
Vancouver, BC
- Upgraded and configured MikroTik switches and routers, set up L2TP/IPSec and WireGuard VPN tunnels, and added or modified complex firewall rules to secure customer networks.
 - Performed network troubleshooting and system upgrades, ensuring high availability of secure communication channels.
 - Configured and upgraded Grandstream IP phones, supported customers, and followed up on RMA requests.
 - Maintained daily site backups using All-In-One WP Migration.
- Digital Forensic Technician (Co-op) — RCMP** Dec. 2024 – Feb. 2025
Royal Canadian Mounted Police — Surrey, BC
- Processed digital evidence using Magnet AXIOM and Cellebrite by imaging and analyzing mobile devices in support of active investigations.
 - Analyzed mobile and computer logs to identify anomalies and potential security breaches.
 - Maintained chain-of-custody integrity through intake logs and secure evidence storage, achieving audit compliance.
 - Documented forensic workflows and produced internal guidelines and summary reports, improving team reference efficiency.
- End-User Support Assistant — Vancouver Community College** Mar. 2022 – Sep. 2023
Vancouver, BC
- Resolved help-desk tickets by troubleshooting Windows/macOS hardware and software issues using Freshdesk and remote-desktop tools; assisted with PC and laptop imaging, configuration, and deployment.
 - Updated and maintained the IT asset inventory using Excel and an internal tracking system, reducing asset discrepancies.
 - Handled hardware installations including peripherals, memory, and storage upgrades; escalated unresolved malfunctions with detailed follow-up documentation.
 - Delivered in-person and remote support across campus, managing Active Directory accounts with strong customer service.
- Front-End Assistant / Tire Installer — Costco Wholesale** Mar. 2020 – Mar. 2026
Burnaby, BC | Part-time while studying full-time
- Delivered customer service to a high volume of members daily, resolving inquiries and complaints with patience and professionalism.
 - Processed payments and returns in compliance with cash-register protocols, consistently meeting service-efficiency targets.

PROJECTS

- RFID/NFC Security Researcher — BCIT Research Day Selection** Sep. 2024 – Apr. 2025

- Simulated unauthorized access by emulating RFID tags with Flipper Zero, Proxmark3, and Raspberry Pi (PN532/RC522); presented vulnerabilities in HID proximity key fobs with proposed mitigation strategies.

High-Availability Data Center Simulation & Hardening — BCIT

Sep. 2024 – Dec. 2024

- Engineered a clustered VMware vSphere (vCenter) environment to host critical, highly available network services in a simulated corporate data center.
- Implemented vSphere High Availability (HA) for automatic host failovers and Distributed Resource Scheduler (DRS) for dynamic workload balancing.
- Hardened hypervisor security with strict vSphere firewall rules, encrypted VM templates, and PowerShell scripts automating host health checks.

Malware Decomposition & Reverse Engineering — BCIT

Sep. 2023 – Apr. 2024

- Analyzed malicious binaries in sandboxed environments using Python and system-monitoring tools, identifying behavioural patterns and persistence mechanisms.
- Produced detailed reports outlining malware impact and mitigation strategies.

Active Directory & Windows Server Administration Lab — VCC

Jan. 2023 – Apr. 2023

- Deployed a Windows Server 2019 domain on Hyper-V with DNS, DHCP, and Group Policy, simulating a corporate network of 50+ managed accounts and OUs.
- Configured Group Policy Objects (GPOs) to enforce security baselines, drive mappings, and software deployment across domain-joined Windows 10/11 workstations.
- Automated user provisioning with PowerShell, reducing onboarding time and ensuring consistent security configurations.

Bad USB / Rubber Ducky — VCC

Sep. 2022 – Apr. 2023

- Scripted a Bad USB using Arduino and PowerShell to demonstrate a reverse-shell payload triggered on connection to a target device.

SKILLS

- **Programming & Scripting:** Python, PowerShell (Hyper-V automation), Bash, C++, C#, Java
- **Security Operations:** SIEM monitoring, log analysis, IDS/IPS configuration, vulnerability scanning, endpoint protection
- **Digital Forensics:** Device imaging, chain of custody, forensic documentation, search-warrant data filtering
- **Networking:** TCP/IP, DNS, VPN (L2TP/IPSec, WireGuard), VLANs, firewalls, packet analysis
- **Systems & Virtualization:** Active Directory, Windows Server, Linux (Ubuntu/Kali), macOS, VMware vSphere (ESXi/vCenter), Hyper-V

TECHNOLOGIES & TOOLS

- **SIEM / Monitoring:** Splunk, Wireshark
- **Network / Firewall:** MikroTik, pfSense, Nmap
- **Forensics:** Magnet AXIOM, Cellebrite, FTK Imager, EnCase
- **Security / Offensive:** Metasploit, Flipper Zero, Proxmark3

CERTIFICATIONS

- CompTIA Security+ — valid through February 2029
- CompTIA A+ — valid through February 2029
- MikroTik Certified Network Associate (MTCNA) — valid through October 2028
- Magnet AXIOM Examiner (MCFE) — Magnet Forensics
- Cellebrite Certified Operator (CCO) & Certified Physical Analyst (CCPA) — Cellebrite
- Cisco Networking Essentials | CS50 Computer Science — Harvard University
